

YAHOO

Use the opportunity to have your own professional MK email which you will never forget, for ex. info@yourcompany.mk [or firstname@lastname.mk]

Inform us at info@registrar.mk which will be your new MK email with your MK domain and what is your Yahoo, in order to be forwarded.

Example:

Your domain is pista.mk, the new email you have decided to be is info@pista.mk and your yahoo is pista@yahoo.com

With this service all emails sent to info@pista.mk, will be automatically forwarded to pista@yahoo.com

- Email forwarding as described above is for FREE.
- [catch] is included for FREE- in case someone is sending by mistake to for ex. info22@pista.mk, instead of info@pista.mk, it will be successfully forwarded even so.
- Also opportunity exist to forward for FREE your MK domain to any Internet site, for ex. your Facebook page.
- For registration or transfer of MK domains, see at www.registrar.mk

Your MK email as default on Yahoo:

[When sending from YOUR Yahoo, the receiver will see you MK email]

Click on ⚙️, then click on Settings and click Writing email. In the "Add send-only address" field, enter your new MK, then click Verify. Check your Yahoo email for a verification message and click the verification link in the message to verify your account.

To make your new MK email as default, click on ⚙️, then Settings and click Writing email. Select your new email from the "Default sending account" drop-down menu. Click Save.

Registrar.MK

#1 Registrar for MK domains
